

K1WAS New England QSO Party 2024

We began setup on Friday after lunch. This included tables, chairs and computer stations. All were linked via Wi-Fi and shared the N3FJP database for logging QSOs. Gary WE1M set up one station for FT8 digital work. Since FT8 is not used for NEQP, this became the “play station” meaning go ahead and make contacts on it but they are a different call sign and logged to a different log. We operated two stations using 100 watts (low power). We had computers at every station and a separate server. One server VM was set to display our log and Ham dash on the wall mounted flat screen and another VM to display our log in front of the server. We utilized the Hex beam, 40 meter dipole and the OCF dipole. We used the Hex beam on all bands as with the OCF.

The 40 dipole was used on 40 meters and we were able to tune it on 15 meters. This mono band dipole was used mostly for the digital fun station.

We completed setting up on Saturday after lunch and (believe it or not) we were ready at the start of the contest. Operators included Jon AI1V, Jeff KB1LZ, Sam W1SMF, Jim KC1RBG, Rock N1UDI and Gary WE1M. Jon AI1V led the way with 93 contacts followed by Jeff at 25.

Sunday the bands were not as good but perseverance brought us to 163 phone contacts vs. 106 last year. While we had no CW contacts this year (and hence our score is substantially lower), we did beat last years SSB QSO count by 60%. (see next page). Great Effort everyone!
